

Please protect America. Save freedom of speech and the First amendment. Competition is healthy. Competition is also what America is built on. Please absolutely reject NAB's petition 04-160 .

Also as an American, it is also the Govt's duty to protect us from challenges against the Freedom of speech and I certainly don't see that happening with all the attacks on talk show host Howard Stern.

It seems to me the FCC thinks it may be working for another government . Please remember this is the United States of America , the founder of "Freedom of Speech" we set the example through out our Heritage for the world to see and test since our country's creation.

Our people have come across oceans to our land to practice Freedom of speech. What is the new example the FCC is setting suppressing upon our rights we fought for.

I ask the FCC to please come to their senses and remember what America is all about. Stop this harassment of Howard Stern and others such as XM Sat Radio. It's hard to believe this is even happening, especially fining broadcasters hefty sums of money. Isn't this practice almost like Taliban/Mafia tactics? It's certainly not American.
